## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Objections***

2. Claims 2-4 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The dose dial and drive mechanism are not further limited in claims 2-4.

### ***Claim Rejections - 35 USC § 112***

3. Claims 2-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 2-5 are unclear. In regards to claim 4, it is unclear whether it is a method claim or an apparatus claim; no additional steps are provided and the claim is not further limited. Claim 5 is also unclear as to whether it is a method claim or an apparatus claim, because no steps are provided.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3763

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Steinfeldt-Jensen et al (US 6,004,297). Jensen discloses a housing (column 2 line 41), a dose dial sleeve (column 2 line 51), a piston rod (column 2 line 42), a drive sleeve threadedly connected to piston rod (column 3 line 45), a reset sleeve (column 3 line 31), and a dose display (column 1 lines 62-63). The mechanism is capable of the dose dial sleeve traveling towards the second end of the housing and resetting dose display to zero position (column 1 lines 12-27), and when dose dial sleeve and/or the reset sleeve travels towards the first end of housing, the dose dial sleeve and/or reset sleeve engages with said drive sleeve and advances drive sleeve and piston rod towards the first end of housing (column 2 line 62 – column 3 line 55).

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. EP 0937471 A2 of Walters et al. discloses a medical delivery pen. US 5,017,190 of Simon et al. discloses a dosage unit for dosing a number of measuring quantities of a liquid, such as an insulin preparation, from a container, preferably a cartridge. US 5,984,900 of Mikkelsen discloses an automatic pen-shaped syringe. US 2002/0120235 by Enggaard discloses an automatic injection device with reset feature. US 5,626,566 of Petersen et al. discloses a large dose pen.
